Benefits for Medical Billers

Many medical billing agencies are unable to manually identify patient insurance, leading to delayed payment for claims and more receivables.

With AR Boost:

- ✓ Correct patient information is **identified automatically**
- ✓ Any valid coverage is **instantly applied to claims**
- ✓ **Fewer** covered patients are **sent to collections**
- ✓ **More** claims are **processed faster**
- ✓ An agency's **cash flow is improved**
- ✓ Revenue is increased by **up to 12%**

Benefits for Healthcare Organizations

Since 2000, hospitals have provided **over \$620 billion** in uncompensated care to patients¹. Part of this is due to improper billing.

With AR Boost:

Medical staff are more likely to be paid — **quickly**

Uncompensated care due to billing issues **is reduced**

Properly billed patients are **more likely to return** in the future

EMS companies see **6:1 return on investment**

Fewer lost revenue write-offs are made

Operational costs **are reduced**

Maximize revenue and streamline pre-billing workflow.
